SUMMARY

Full-Stack Developer skilled in Angular, React, NodeJs, ExpressJs, NestJs, and TypeScript, with a strong foundation in **DataStructures & algorithms**, and problem-solving. Experienced in creating responsive and modern UIs using Angular Signals, TailwindCSS. Passionate about learning new technologies and contributing to real-world software development teams.

TECHNICAL SKILLS

Programming Languages: JavaScript

Frontend: Html, Css, Angular, React, Redux, NgRx

Backend: NodeJS, NestJs, ExpressJs

Database: MongoDB

Tools & others: Git, GitHub, REST APIs

EDUCATION

Bahauddin Zakariya University

B.S. in Computer Science

2022 – 2026

Multan, Pakistan

COURSES & CERTIFICATIONS

Introduction to Retrieval-Augmented Generation (RAG)

coursera

Introduction to Git and GitHub

coursera

EXPERIENCE

Full-Stack Developer Intern – OnlinxSolution

June 2024 – Aug 2024

- Built and enhanced a Todo app using Angular, focusing on component reusability and efficient state updates
- Improved application performance by optimizing change detection and reducing unnecessary renders
- Transitioned to backend development with NestJS and implemented a complete authentication module
- Designed secure API endpoints for user login and registration

PROJECTS

ECommerce Website

Tech Stack

Angular, NestJs, MongoDB

Build a full-stack **eCommerce system** using **Angular (Signals)** and **NestJS**, designing modular REST APIs with **JWT-based** authentication. Implemented efficient client-side state management for **cart** and **wishlist**, ensuring consistent synchronization with backend services. Integrated **Stripe** payment gateway to handle secure checkout sessions and payment processing. Built responsive UI with TailwindCSS and optimized rendering performance by minimizing unnecessary component updates.

AI powered Notes generator

Tech Stack

ReactJs, NodeJs, ExpressJs, MongoDB

Developed an AI-driven web application that processes PDF documents to generate summaries, flashcards, and structured notes using large language models. Implemented document parsing, text extraction, and backend services for managing user sessions and chat-based data organization. Designed and integrated RESTful APIs with a React frontend to handle file uploads and display generated outputs efficiently.
